

10th INTERNATIONAL CERAMICS CONGRESS

Part B

TABLE OF CONTENTS

SECTION D - SINTERING SCIENCE AND TECHNOLOGY

Microwave sintering of ceramics: what does it offer? J. Binner	3
Stresses and distortion during the co-firing of ceramics D.J. Green, A. Mohanram, S.-H. Lee, G.L. Messing	15
Processing and mechanical properties of alumina with anisotropic microstructures Y. Yoshizawa	23
Sinter-HIP of sub-micron pure alumina and alumina-zirconia composites J. Tarazona, F. Castro, J. Echeberria	33
Tough and strong Ca-TZP's doped with TiO ₂ W. Pyda, N. Moskala, A. Pyda	41
Densification and grain growth control of advanced TiN oxide ceramics J.A. Varela, E. Longo, E.R. Leite	49
Sintering investigation of silicate-apatite [Ca ₉ Nd(SiO ₄)(PO ₄) ₅ F ₂] F. Audubert, D. Bernache-Assollant	61
The sintering of alumina, zirconia and ceria ceramics using high-temperature dilatometry K. Maca	69
Thermal stability of silica-modified titanias prepared by the glycothermal method S. Iwamoto, M. Inoue, T. Tanaka, H. Yoshida, K. Kagawa	77
Influence of mechanical activation on synthesis and sintering of calcium titanate T. Sreckovic, Z. Marinkovic, V. Petrovic, I. Radosavljevic Evans, R. Novakovic	85

Effect of crystallite size and calcination temperature on thermal stability of single nanocrystalline chromium oxide: explained by novel correlation P. Prasertthdam, J. Phungphadung, W. Tanakulrungsank	93
The effect of silica added on large surface area of nanocrystalline titania W. Tanakulrungsank, S. Tienkaew, P. Prasertthdam	101
Glycothermal synthesis of silica-modified zirconia S. Kongwudthiti, P. Prasertthdam, M. Inoue, W. Tanakulrungsank	109
One pot solvothermal synthesis of thermally stable, porous silica-modified alumina powders by supercritical removal of organic solvents O. Mekasuwandumrong, P. Prasertthdam, M. Inoue, W. Tanakulrungsank	115
Synthesis and sintering of fine-CeO ₂ powders prepared by the polymeric organic complex solution method P. Duran, D. Gutierrez, J. Tartaj, C. Moure	123
Preparation of nano-sized LaYO ₃ powder, and studies of pressureless and spark plasma sintering K. Jansson, M. Nygren, G. Westin	131
Dielectric properties of Sr(Bi ₂ Ta ₂) _{0.95} Ti _{0.2} O ₉ ceramics P.-S. Cheng, Y.-C. Chen, C.-F. Yang, C.-C. Chan	139
Sintering of nanocrystalline zirconia prepared by chemical vapor synthesis at different temperatures V.V. Srdic, M. Winterer, H. Hahn	145
Sintering of cordierite-aluminium hydroxide mixtures A. Harabi, N. Aklouche, M-R. Boudchicha, S. Achour	153
Shape prediction when sintering ceramics Z. Ghizdavet, D. Radu	161
Crystal growth and sintering of SiC by the spark plasma system (SPS) M. Omori, A. Okubo, Y. Furuya	167
Spark plasma sintering of SiC nano-powders M. Ohyanagi, T. Yamamoto, H. Kitaura, K. Shirai, Z. Munir	175
Densification of silicon nitride with Li-exchanged zeolite additive B. Matovic, G. Rixecker, F. Aldinger	183
Sintering kinetics of silicon carbide A. Gubernat, L. Stobierski	191
Manufacturing of multilayer composites of SiC and AlN by liquid-phase sintering S. Wildhack, G. Rixecker, F. Aldinger	201

The effect of grain size and stoichiometry on the pressureless densification of boron carbide N. Frage, L. Levin, N. Froumin, M.P. Dariel	209
Sintering performance and properties of pressed Si ₃ N ₄ materials K. Rundgren, O. Lyckfeldt	217

SECTION E - NON CONVENTIONAL ROUTES TO CERAMICS

E-1 Near-Net-Shape

Influence of additives on nitriding mechanism and properties of reaction-bonded silicon nitride (RBSN) V.V. Vikulin	227
Metallic tools obtained from ceramic moulding using a sol-gel process T.P. Duarte, F.J. Lino, A. Barbedo, J.M. Ferreira	235

E-2 Polymer Pyrolysis

Precursor ceramics for microfabrication J. Ott, H. Freimuth	245
Effects of size and morphology of aluminium particles on mullite formation via active filler-controlled pyrolysis of siloxanes J. Anggono, B. Derby	253
Fabrication of high performance boron nitride fibers from tailored borazine-based molecular and polymeric precursors P. Miele, B. Toury, S. Bernard, D. Cornu, F. Chassagneux, J. Bouix	261

E-3 SHS Ceramics

Phase and structure transformations during self-propagating high temperature synthesis (SHS) A.G. Merzhanov, A.S. Rogachev	271
Ceramic matrix composites via SHS-derived powders R. Pampuch	283
SHS processing of functionally graded carbide based composites E.Y. Gutmanas, D. Horvitz, I. Gotman	295
SHS synthesis and activated sintering of TiC-TiB ₂ -Ni composites D. Vallauri, P.L. De Cola, F.A. Deorsola, G. Maizza, I. Amato	307

SH-synthesis and compaction of TiN/Si ₃ N ₄ composite ceramics for thin film application S.L. Kharatyan, K.V. Manukyan, H.H. Nersisyan, V.N. Subbotin, N. Wu, K. Cho, A. Ignatiev	317
Structural and functional materials in the Si-Ti system prepared by combustion technique (SHS) J. Lis, L. Chlubny, M. Cyganik, R. Pampuch, L. Stobierski, D. Zientara	325
Filtration combustion in the Al-O-N system D. Zientara, J. Lis	331

E-4 FGMs / Microwave Processing

Functional gradients for novel microstructures W. Kaysser, M. Bartsch, M. Peters, U. Schulz, C. Drasar	341
SHS FGM: review and prospect C.C. Ge, W.B. Cao	355
Microwave processing of materials D. Clark, D. Folz	367
Microwave processing of ceramics and metallic materials in single mode E field and H field D. Agrawal, J. Cheng, R. Roy	381
Synthesis of nano-size microporous alumino-silicates using microwave hydrothermal method H.M. Lim, B.G. Ahn, S.-J. Jung	389

E-5 Shock Synthesis, Dynamic Compaction, Very High Pressure Processing

Shock-wave-synthesis of silicon nitride-based ceramics T. Sekine	399
Shock-activated reaction synthesis of Ti-based ternary Ti ₃ SiC ₂ and Ti ₂ AlN ceramics J.L. Jordan, N.N. Thadhani	405
Application of magnetic pulsed compaction for sintering of nanostructured oxide ceramics V. Ivanov, S. Pararin, V. Khrustov, Y. Kotov, S. Ivin, A. Nikonov, A. Medvedev, A. Shtol'ts	417

E-6 Soft Solution Processing

Novel exfoliation-restacking route to epitaxially grown high- T_c superconducting film J.-H. Choy	427
Soft solution synthesis of complex oxide heterogeneous photocatalysts M. Hara, K. Domen	435
Synthesis and photochemical properties of layered double hydroxide/UV ray absorbing molecule/silica nanocomposites Q.-L. He, S. Yin, T. Sato	445
Preparation of $\text{La}_{1-x}(\text{Sr,Ba})_x\text{MnO}_3$ nano-phase powders and films from alkoxide precursors A. Pohl, G. Westin	453
Synthesis of Mn-doped ZnS nanocrystal phosphors/silica thin films by sol-gel method Y. Hu, Y.-J. Gao, H.-Y. Chen, C.C. Tai	461
Designing substrates for bioinspired processing of vanadium oxide hydrate ($\text{V}_2\text{O}_5 \cdot n\text{H}_2\text{O}$) thin films J.-J. Shyue, M.R. De Guire	469
Biomimetic patterning of ceramic thin films Y.-Y. Kim, L.B. Gower	481
Porous SiC ceramics via carbothermal reduction from pyrolysed wood U. Vogt, A. Herzog, R. Klingner, T. Graule	493
Novel ferrite films and fine particles prepared at 3~100 °C by a soft solution processing and their applications M. Abe	501
Glycothermal reaction of vanadium and molybdenum compounds M. Inoue, F. Fujioka, S. Iwamoto	511
Preparation of PZT film on conducting ceramic electrodes using Ti- and Zr-alkoxides and $\text{Pb}(\text{NO}_3)_2(\text{EO}_3)_{1.5}$ K. Lashgari, L.G. Westin	517
Sol gel synthesis and characterization of cassiterite C. Piña P, M. Portilla, C. Salcedo	525
Nucleation and crystallization of TiO_2 xerogels obtained from organo-metallic solutions Z. Strnad, P. Mecner, Z. Krejcova, J. Strnad	529
Montmorillonite intercalated with Al, Zr, Cr, RE (La, Ce, Nd) M.L. Chávez-García, L. de Pablo-Galán, M.P. Saucedo	535

GC-MS studies of the molecular species identified in hydrolysis-condensation reactions of tetraethoxysilane and some alchil derivatives V. Badescu, M. Radu	543
Synthesis and photocatalytic activities of ultrafine titania crystals by low temperature dissolution-reprecipitation process S. Yin, H. Hasegawa, Q. He, T. Sato	551
Synthesis of Co-Al ceramic pigments using hydroxide and hydrotalcite precursors obtained by coprecipitation method T.S. Lyubenova, R.S. Pavlov, N. Masó, P. Escribano, E. Cordoncillo, J.B. Carda.....	559
High quality manganite powders synthesized with a new reactor technology M. Aoun-Habbache, S. Guillemet-Fritsch, J. Sarrias, A. Rousset, N. Jongen, M. Donnet, P. Bowen, J. Lemaitre	567
Ceramic foams based on biopolymers M. Meyer, N. Brandes, A. Berthold, I. Garrn, L. Kroh, H. Schubert	575
 E-7 Other Emerging Processing Directions and Materials	
Synthesis and properties of hybrid inorganic-organic polymers based on organically modified Si-alkoxides and their use for permeation control K.-H. Haas, S. Amberg-Schwab, T. Ballweg	581
Coprecipitation route to vitamin-LDH nanohybrids Y.H. Son, S.Y. Kwak, J.H. Choy	593
Reduction-nitridation of titanium oxide fibers N. Hotta, R. Yonezawa, Y. Hosomichi, T. Watanabe, M. Hotta, T. Meguro	601
AUTHOR INDEX	609
