

# SCIENCE FOR NEW TECHNOLOGY OF SILICATE CERAMICS

## TABLE OF CONTENTS

### SECTION 1 - SCIENCE OF SILICATE CERAMICS

Recent advance in porcelain sintering W. Schulle .....	3
Structural characterisation of mullite from Fe-doped kaolins P. Blanchart, N. Soro, J.P. Bonnet, L. Aldon, J. Fourcade, J.C. Jumas .....	9
Optimisation of ceramic systems using experimental design and modelling D.A. Lever .....	17
Optimization of kaolin suspensions A. De Pretis, A. Papo, L. Piani .....	25
Mullite synthesis by presence of liquid phase via illite clay G. Sedmale, I. Sperberga, U. Sedmalis, A. Actins .....	31
Microstructure and formation mechanism of fire-mark pattern on Japanese traditional "Bizen" earthenware Y. Kusano, A. Doi, M. Nakanishi, T. Fujii, J. Takada, M. Fukuhara, R. Murakami .....	39
Controlling glaze surface effects R.A. Eppler .....	43
Modelling of firing behaviour of raw glazes T. Kronberg, L. Hupa, K. Fröberg .....	55
The influence of the additional element and the heat temperature upon traditional red color pigment H. Asaoka, M. Nakanishi, T. Fujii, J. Takada, Y. Kusano, R. Murakami .....	63
Thermoresistant pigments containing vanadium. Composition-synthesis conditions-structure-color correlations C. Pacurariu, D. Cor, I. Lazau, R.I. Lazau .....	69

The effects of additives on time dependency of a silk screen paint formulation E. Rastelli, A. Tucci, L. Esposito, R. Fornaciari .....	77
Self humidity control materials Y. Shibasaki, S. Tomura .....	85
Structural evolution of clay minerals on firing deduced from solid state NMR, XRD and TEM C.J. McConville, G.E. Roch, W.E. Lee, M.E. Smith .....	97
Microstructure development of ceramic roofing tiles J. Ranogajec, A. Mesaros, P. Kermecci, R. Rekecki .....	109
Composition-microstructure-properties relationship for a ceramic material A. Goleanu .....	117

## **SECTION 2 - RAW MATERIALS, WASTES AND BY-PRODUCTS**

Natural zeolites in ceramic tiles: prospects and limits M. Dondi, M. De Gennaro, R. De Gennaro, P. Cappelletti, G. Cerri, G. Guarini, A. Langella, D. Naimo .....	127
Typological analysis of raw materials for roofing tiles L. Balavoine, J. Yvon, R. Cristancho .....	135
Ceramic utilization of clays from Cohauila State (Mexico) V. Venturi, C. Fiori, G. Giuliani .....	143
Development of glassceramic materials using zeolites as raw material E.A. Ramírez, S. Martínez, C. Diaz, N. Bogdanchikova .....	151
Structural and textural analysis of ceramics designed from weathered granites K. Devineau, F. Villieras, J. Yvon, J.-P. Henry .....	155
Consolidation of pressurized fluidized bed combustion ash (PH-ash) by the geopolymer technique at ambient temperature T. Kihara, A. Mikuni, Y. Nakamura, R. Komatsu and K. Ikeda .....	163
Industrial wastes and by products: a massive reuse in ceramic industry G. Usai .....	169
Prevention of the transformation of dicalcium silicate in stainless steel slag during cooling process N. Sakamoto, S. Sato, K. Kawata, F. Noguchi .....	179
On the utilization of red mud in the heavy clay industry in Greece V.M. Stivanakis, Y.T. Pontikes, G.N. Angelopoulos, D. Boufounos, D. Fafoutis .....	187

Ecoglass-ceramics design with use of the waste with inorganics compounds C. Diaz, E. Reynoso, R. Jordan, O. Arzabe, M.E. Zayas .....	195
Superior revaluation of some by-products from the mining industry for obtaining naturally coloured mat glazes G. Kovacs .....	203

### SECTION 3 - RESEARCH FOR QUALITY AND NEW PRODUCTS

Development of self humidity control wall Y. Muraguchi .....	213
Thermal conductivity of clay bricks: the influence of microstructure and phase composition M. Dondi, F. Mazzanti, P. Principi, M. Raimondo, G. Zanarini .....	223
Pore structure of porous building ceramic materials from illite containing raw materials A. Cimmers, R. Svinka, V. Svinka, H. Moertel .....	231
Water vapour permeability of clay bricks M. Raimondo, M. Dondi, F. Mazzanti, P. Principi, G. Zanarini .....	239
Development of a new building material with the function of air humidity control Y. Nishigaki, K. Suzuki .....	247
Recent advances in the research for new ceramic pigments G. Monrós .....	255
New glass-ceramic materials for ceramic industry G. Baldi, A. Barzanti, V. Faso .....	267
New product and process solutions for glassy mosaic F. Matteucci, M. Dondi, G. Guarini, C. Fiori .....	279
Synthesis of hematite-zircon ceramic pigment by urea homogeneous coprecipitation A. Garcia, J. Calbo, S. Sorlí, D. Bedoya, M. Llusar, J. Badenes, M.A. Tena .....	287
Spectroscopic characterization of a new synthetic hercynite-based pigment G. Baldi, A. Barzanti, G.P. Bernardini, F. Di Benedetto, V. Faso, M. Romanelli .....	299
Polishing and strength degradation of the working surface of porcelain stoneware tiles L. Esposito, A. Tucci, E. Rastelli, C. Palmonari .....	303

On line surface and subsurface crack detection in ceramic tiles and pavements by ultrasounds J.B. Santos .....	311
Anorthite ceramics based on plagioclases concentrated from gabbro A. El-Maghraby, H.A. Mobarak, I. Bakr, H. Mörtel, S.M. Naga .....	319

#### **SECTION 4 - RESEARCH FOR NEW TECHNOLOGY**

Pressure controlled slip casting S. Sano, A. Tsuzuki, K. Oda, Y. Shibasaki .....	329
Incorporation of biological paper-pulp sludge on expanded clay formulations P. São-Marcos, J.A. Labrincha, K. Rosenbom .....	337
Hydrogen chloride removal by hydroxyl sodalite or hydrogrossular at high temperature K. Suzuki, Y. Shibasaki, S. Fujita, T. Yamasaki, N. Ogawa, T. Fukuda, S. Sataka .....	345
Analysis of the emissions while firing for bodies and raw materials in the ceramic sector G. Parasporo, M. Ristic .....	357
<b>AUTHOR INDEX</b> .....	363
