

REFRACTORIES: TRENDS IN RESEARCH AND APPLICATION

TABLE OF CONTENTS

SECTION 1 - BASIC RESEARCH AND PROCESS SCIENCE

Past, present and future studies of slag attack of refractories W.E. Lee, B.B. Argent, S. Zhang	3
Oxidation kinetics of magnesia-carbon refractory H. Sunayama, M. Kawahara	15
Direct observation of interfacial phenomena, such as local corrosion, slag and metal penetration into refractories, using a high temperature X-ray radiographic technique K. Mukai, T. Matsushita, Z. Li	23
Applying a computer modeling predicting MgO saturated slag chemistry to extend basic refractory service life K.-S. Kwong, J.P. Bennett	35
Role and behavior of additive in the carbon-containing refractory (on new additive: Al_4O_4C , Al_4OC , $Al_8B_4C_7$ and Al_4SiC_4) A. Yamaguchi	43
Study of a ceramic refractory reinforced with metallic fibres: from the microstructure to the mechanical behaviour E. Cailleux, T. Cutard, G. Bernhart	53
High-temperature properties and thermal shock resistance of refractory castables C.M. Peret, J.A. Rodrigues, A.E.M. Paiva, E.L.G. Villaboim, S.F. dos Santos	61
Influence of raw material on structure of fused alumina magnesia spinel O. Shatilov, V. Koptelov, I. Maryasev, F. Kaplan, M. Koreshkova, S. Morozov	69
The effect of zirconia addition on microstructure and properties of dolomite refractories F. Golestani-Fard, H. Mollaie, F. Moztarzadeh, F. Zahed	85

High density infrared surface treatment of refractories T.N. Tiegs, F.C. Montgomery, C.A. Blue, M. Velez	93
Double-torsion test and determination of the R-curve of alumina refractory castables M.C.F. de Albuquerque, J.A. Rodrigues	101
Prediction of thermal shock behavior of alumina based refractories T. Volkov-Husovic, R. Jancic	109
Densification of kaolin - doloma mixtures S. Achour, A. Charidi, A. Harabi	117
The effect of aluminum on phase evolution in magnesia-graphite refractories M. Bavand-Vandchali, F. Golestani-Fard, A. Mirhabibi, S. Rowshanfekr-Fallah	125
The behavior of calcium dialuminate-based refractory compositions on heating S. Jonas, F. Nadachowski, D. Szwagierczak, B. Trybalska	133

SECTION 2 - MANUFACTURING AND CONTROL

Technology of non-porous refractory production S. Serkowski, M. Müller	141
Novel light weight refractory bricks V. Svinka, H. Moertel, S. Krebs	149
The development of coating materials for tundish H. Zhiyong, L. Lin	161
New technology for kaolinite based refractory bricks V. Svinka, H. Moertel, S. Krebs	167
Rapid quality control of fusion cast refractories by X ray fluorescence method G. Toma, N. Toma	175
A comparative study of refractory lining materials for steel ladles S. Yilmaz, S. Özgen	183

SECTION 3 - REFRACTORY SELECTION, DESIGN AND APPLICATION

Refractory selection for industrial manufacture of high quality glasses S.M. Winder, K.R. Selkregg	191
Penetration of basic refractories - The effect of oxygen potential C.A. Rodriguez, W.F. Caley, R.A.L. Drew	209

Improved refractories for slagging gasifier applications C.P. Dogan, J.P. Bennett, K.-S. Kwong, R.E. Chinn, C.L. Dahlin	217
Quartz ceramics for manufacturing Nd-doped phosphate glasses for active elements of high-power lasers V.I. Arbutov, N.V. Garibina, V.S. Shashkin, A.V. Shashkin	225
Development of mullite-cordierite kiln furniture for tile industries M. Jafari, M. Hejazi, A.N. Khah	229
Carbon-containing castables for steelmaking applications M. Rigaud, S. Palco	235
An overview of recycling refractory materials J.P. Bennett, K.-S. Kwong	251
Selection criteria of refractories for non-ferrous smelting furnaces G. Oprea, M. Brothers	263
Energy conservation and environmental protection from refractory- technological viewpoints K. Sugita	275
Energy conservation in electrically heated treatment furnaces in alloy steel plant of India A.K. Bhattacharya, P. Chintaiyah, D.P. Chakraborti, M.S. Mukhopadhyay, S. Chakraborty	285
AUTHOR INDEX	293
