

COMPUTATIONAL MODELLING AND SIMULATION OF MATERIALS II

TABLE OF CONTENTS

SECTION 1 - FUNDAMENTAL COMPUTATION AND SIMULATION OF MATERIALS

Optical conductivity of liquid semiconductors J.R. Chelikowsky, M. Jain, J.J. Derby	3
Superconductivity of MgB ₂ from first-principles H.J. Choi, D. Roundy, H. Sun, M.L. Cohen, S.G. Louie	15
Multiscale computer simulations for polymeric materials C. Abrams, K. Kremer	27
Tuning force fields for the simulation of large systems G. Trimarchi, T. Albaret, P. Gumbsh, S. Meriani, J. Barth, A. De Vita	35
The modified J-Matrix method for potential scattering J. Broeckhove, F. Arickx, W. Vanroose	43

SECTION 2 - COMPUTER SIMULATION OF STRUCTURE, PROPERTIES AND BEHAVIOUR OF MATERIALS

Atomistic simulation of defect properties in bcc tantalum L.H. Yang, P. Söderlind, J.A. Moriarty	51
A random walk investigation on the effect of dispersed phases on diffusion H. Larsson, J. Ågren	59
Numerical treatment of substitutional and interstitial diffusion for methane formation in low alloy Cr-Mo steels during hydrogen attack S.M. Schlögl, E. Van der Giessen	67
Long-range character of lattice distortion by vacancies in α -quartz P.V. Sushko, V.B. Sulimov, A.S. Mysovsky, A.L. Shluger	75
Effect of dislocation network on nucleation and growth of voids near grain boundaries in irradiated materials S.L. Dudarev, A.A. Semenov, C.H. Woo	87

Zinc addition to sodium-calcium-silicate bioglasses. Theoretical vs experimental results G. Lusvardi, G. Malavasi, L. Menabue, M.C. Menziani	91
Melting and coalescence of metal nanoclusters S. Wang, S. Zhao, H. Ye	99
Structural phase transformation in InSb: a molecular dynamics study J.P. Rino, S.C. Costa	107
Atomic and electronic structures of polar interfaces between silicon-carbide and titanium S. Tanaka, M. Kohyama	113
Computational modeling of electron properties of 26 d-elements in nanolayer Y-doped tetragonal zirconia T. Tokiy, T. Konstantinova, D. Savina, V. Tokiy	121
Tetradecyltrimethylammonium bromide molecular aggregation W. Pimpong, O. Rangsiman, K. Vongbupnimit, K. Tashiro	129
Prediction of hydrogen-bond networks in poly(<i>m</i> -phenylene isophthalamide), poly(<i>p</i> -phenylene terephthalamide) and their model compounds P. Nimmanpipug, K. Tashiro, O. Rangsiman, W. Thanyamaneelertsakul	137
Computer simulation of structure and physical properties relationship in polymer crystals K. Tashiro	145
Light absorption of a random planar array of quantum dots; the effect of size and density E. de Paula Abreu, P.D. Emmel	157
On the application of advanced computing techniques to the determination of thickness and defocus from high resolution transmission electron microscopy images P.L. Galindo, F.J. Pacheco, S.I. Molina, A.M. Sanchez, R. Garcia, I. Turias, E. Guerrero, A. Yañez, J. Pizarro	165
Stochastic modeling of the mechanical behavior and reliability of brittle or moderately damage-tolerant materials V. Cannillo, W.C. Carter	173
Modeling of grain pullout in polycrystalline alumina J. Ohgi, M.T. Kokaly, A.S. Kobayashi, K.W. White	181
Finite element modelling of the non-linear mechanical response of brittle materials C.M. Chandler, R.J. Henderson, H.W. Chandler	189
Tensile strength and fracture of grain boundaries in silicon-carbide: a first-principles study M. Kohyama	197

Atomistic simulations of nanoceramics C.L. Rountree, L. Van Brutzel, M.E. Bachlechner, E. Lidorikis, A. Nakano, R.K. Kalia, P. Vashishta, P. Walsh	205
Two dimensional simulation of superplastic deformation B.-N. Kim, K. Hiraga	217
Evaluation of influence of the interface transition zone on the behaviour of concrete using a 2D lattice model E.P. Prado, G. Lilliu, J.G.M. van Mier	225
FEM-modelling of deformation behavior of porous ceramic O. Kilina, P. Kilin, S. Kulkov	233

SECTION 3 - COMPUTATIONAL MATERIALS DESIGN AND PROCESSING

Stochastic modelling of columnar solidification grain structures Ch.-A. Gandin, G. Guillemot	239
Modelling of pyrocarbon chemical vapor infiltration N. Reuge, G.L. Vignoles, H. Le Poche, F. Langlais	251
Molecular dynamics simulation of defect formation during energetic Cu deposition C.M. Gilmore, J.A. Sprague	259
Modeling of crystal growth from the melt G. Müller	267
Effect of surface roughness on packing behavior in sphere-pack MOX fuel M. Suzuki, S. Kono, H. Ozima, K.-I. Fujii	279
Designing expert system for in-situ toughened Si ₃ N ₄ with soft computing Q. Zeng, L. Zhang, J. Zu, G. Dai	287
Molecular simulation of a montmorillonite pillared layered structure A. De Stefanis, G. Perez, E. Semprini, F. Stefani, A.A.G. Tomlinson	295
Simulation of 2D and 3D shapes etched in a 35% NaOH solution C.R. Tellier, C. Hodebourg, T.G. Leblois	299
Physicochemical kinetics of silica glass deposition in plasmachemical technology of optical fiber preforms A.N. Denisov, A.S. Biriukov, K.M. Golant	307
Growth of ZnSe layers by chemical vapor deposition in a vertical reactor E.A. Garibin, A.A. Demidenko, I.A. Mironov, A.N. Vorob'ev, S.E. Khoruzhnikov, V.N. Vasiliev	315
AUTHOR INDEX	325
